

CADSTATION

CLIENT TOOLS OVERVIEW

CADSTATION is the only product providing a complete set of client tools for the Canon imagePROGRAF series of wide format color plotters.

PLOTCLIENTSET

With PLOTCLIENTSET a number of documents can be combined to create a set and provide for affecting output settings such as copy count, output device, media size, color depth, etc. PLOTCLIENTSET is available for clients using Windows PCs.

PLOTCLIENTHDI

With the PLOTCLIENTHDI, drawings can be sent directly out of Autodesk applications such as AutoCAD or Autodesk Mechanical. This client fully integrates into Autodesk applications and provides further output settings such as copy count, output device and account settings. Additionally, PLOTCLIENTHDI can automatically use PLOTCLIENTSET for set creation.

PLOTCLIENTWEB

PLOTCLIENTWEB is a server based application offering platform independent access to the CADSTATION system. Users connect with a standard Web Browser via Intranet or Internet to put drawings together to create a print set and to set the output information such as copy count, output device and account settings. Additionally, PLOTCLIENTWEB provides full color previews without installing a plugin on the client pc.

ACCOUNTINGCLIENT

CADSTATION Accounting Client offers you the easiest and most convenient way to generate invoices and delivery notes for the print/copy services directly out of your CADSTATION solution. Simply open the Accounting Client in your web browser and select the desired time period, the account, project or cost center as well as the corresponding price list to receive invoices and delivery notes as PDF at the click of a button.

WINPRINT

The Windows Printer Driver (WINPRINT) integrates like a standard printer driver into Windows operating systems. With WINPRINT documents can be sent from of any Windows application to CADSTATION. Further output settings such as copy count or output size can be made. WINPRINT will transfer the user name (captured from Windows Login) to CADSTATION for accounting purposes. Furthermore the CADSTATION WINPRINT is able to run on WINDOWS 2003 Server systems giving full Windows 2003 Server support for the imagePROGRAF series of plotters.

DRAG & DROP

With the drag & drop functionality, documents can be copied into an automatic spool directory (hot folder) to be printed via CADSTATION.
