# Why Buying a Graphtec

*Large Format Scanner*

# Is The Right Choice!

*Sharper Images | Unsurpassed Reliability | More Versatile*

*Experience the Graphtec Advantage*

**“ I WOULD NOT consider purchasing ANY OTHER BRAND. Last year we scanned 20,000 maps; over the next 12 months I expect to scan 60,000 maps. We are a very happy Graphtec user! Thanks! ”**

*- Mark Silver Igage Mapping Corporation*

“The Graphtec CS 600-Pro is an excellent scanner that, so far, fits our needs quite well. The Paradigm Imaging staff has been very helpful and effective in addressing operational concerns. I am also grateful for the balanced presentation by Paradigm of alternative models and brands during the selection process. I recommend Graphtec and Paradigm to anyone considering a scanner purchase.”

*-Eric Hopkins - West Virginia University*

“I have had a wonderful experience with using the Graphtec line of scanners. They produce much better images than the Kodak i260's.”

*-Bill Wiser - iScan*

“Scanner Rocks!!! Software Purchase went great!! Super fast delivery. Setup no problem. A+++ all around!!!”

*-Chris Kulick - Ayres Associates*

“We had a very large project to complete - scanning over 1,600 documents - in a span of a few months. We had no problems with the scanner or software. The vendor was very pleased with the quality of the scans - none had to be re-scanned. With all the other issues our project presented - we were thankful that the scanner was not one of them.”

*-Cherie Prentice Brown - City of Lebanon, PA*

“The CS 400 has worked very well for us. Together with the CS 400 we have an HP 5500 PS plotter that is used for multiple purposes. Combined, this equipment makes a great large scale copy machine.

In addition, we have found the reliability of the equipment, and support that you have provided, to be exceptional. I found the setup to be easier than a desktop computer. This together with the physical size and weight, mobility, quality of image, and dependability has made this Graphtec scanner the right choice for us. Thanks for all your help.”

*-Jon Lennander - Tollefson Development*
